

**BRAVEHEART  
MARINE BV**

Braveheart Marine is a flexible company, strong in hydrographic activities. We own about 10 vessels which are equipped with hydrographic equipment, which we rent out to clients from the (inter)national dredging and offshore industry. Due to the most recent expansion of our fleet, the 73 meter long MV Braveheart Spirit, we are looking for a:

## **Survey Engineer**

As Survey Engineer on board you are responsible for maintaining, troubleshooting and operating the hydrographic sensors on board. These consist of multi-beam echosounders, ultra-short baseline systems, side scan sonar, motion reference units, GNSS receivers etc. Also collecting data will be part of your responsibilities.

Keeping both us and the client satisfied is an important element of the job, so being able to work in a team with regular changing compositions is a must.

What we require from you:

- Technical bachelor
- Experience in similar work with a minimum of 3 years
- Operating, troubleshooting and maintaining survey equipment will be the most important part of the job
- Coordinate between the survey client on board and the office
- A high standard to be kept in your work and administration (i.e. QHSE)
- Good knowledge of the English language, both written and spoken

What we offer:

- A great, versatile job on our largest and latest vessel, MV Braveheart Spirit
- No day will feel like the same, neither will the view
- The ability to work with a large variety of survey equipment and operations
- Being part of a growing, inspiring and innovating international oriented and family owned business
- Room for own initiatives and creativity
- Fixed rotation
- Good salary

Ready for a new challenge? And do you recognize yourself in both what we require, and what we offer? Then please contact our HR department via [jobs@braveheartmarine.com](mailto:jobs@braveheartmarine.com) and send your motivational letter and CV!
